

Dr LEONARD ESAKOWITZ FRCOphth FRCS(Ed) DO

I was born in Johannesburg, South Africa, and educated in Witbank, and in Johannesburg at the Witwatersrand University medical school. Further training was in Houston, Texas, London, Glasgow and Aberdeen. Consultant Ophthalmologist with special interest in ocular motility and children's eye problems. Now retired and enjoying my interests of photography and visual art, the natural world, travel, my book club, live music (mainly classical but some jazz and folk) foreign films, theatre, maintaining my classic car, and trying to grow things on my allotment. Cycling and hill walking. The company of family and friends, often sharing good food and fine wine. Always been curious about how things work – or don't. Love gadgets and mechanisms.

Life greatly enhanced by the Royal Glasgow Philosophical Society over many years.
